Collection system outreach will be located in the Training Room of the Process Building at the Southwest Wastewater Treatment Plant (3301 West Bypass, Springfield, MO 65807.)

There are 25 parking spaces next to the Process building where sessions will take place. There are 50+ additional parking spaces located near the main employee building at the front gate entrance. However, these are quite a distance from the Training Room. If parking in one of the secondary parking spaces, carpool from the front entrance lot down to the lot next to the Process Building. Entrance to Process Building is the doorway on the Southwest corner of the building.
